SELECTED WORKS 2023–2026

Lena Park Portfolio

Designing tools that make complex systems readable under pressure.

ABOUT

I design product surfaces, operating views, and decision systems for technical teams.

My best work sits between interface design and operating design. I care about clarity under load: making tools easier to use when the task is ambiguous, cross-functional, or expensive to get wrong.

Background

I started in workflow software, then moved into data products and applied AI. Across each shift, the pattern stayed the same: define the real decision, remove ornamental complexity, and make the page teach the system.

Focus

Today I focus on agent products, research tooling, and service interfaces. I work from evidence outward, using traces, interviews, and operating constraints before I choose the visual system.

01

AI WORKFLOW PLATFORM

North Ridge Copilot Console

2025.03 - 2026.01

A control surface for high-stakes support agents used by operations teams.

AGENT OPS | WORKFLOW | B2B SAAS

Context

Support operators had no stable way to understand why an agent answered the way it did. The product had strong model behavior but weak operational legibility, so escalations were slow and trust eroded.

Approach

I centered the page on trace readability: one persistent claim, one timeline of tool use, and one clear recovery path when confidence dropped. The layout reduced cross-panel scanning and gave reviewers a single visual hierarchy.

Outcome

Escalation handling time fell 34%, quality-review throughput rose 2.1x, and onboarding time for new operators dropped from 10 days to 6.

02

RESEARCH TOOLING

2024.06 - 2025.02

North Ridge Copilot Console

An internal report composer that turns research traces into executive-ready briefs.

RESEARCH RESEARCH

投资逻辑

特斯拉 Q1 2026 营收 $22.39B（同比 +16%），超市场预期的 $21.92B；Non-GAAP EPS $0.41，高于预期的 $0.37。毛利率从去年同期的 16.3% 恢复到 21.1%（+478 bps），能源业务毛利率创历史新高 39.5%。汽车业务释放了矛盾信号：交付 358,023 辆，低于市场预期约 7,600 辆，但利润率扩张的叙事依然成立。

核心矛盾：短期利润率恢复 vs 2026 全年 $25B+ 资本开支承诺。管理层预期全年自由现金流转负。财报后股价下跌 3.56%，市场定价的是资本开支冲击而非盈利超预期。

> **持有。**Q1 利润率恢复验证了降本能力，但 $25B capex + 负 FCF 指引意味着当前股价定价了 AI/Robotaxi 的期权价值，而这部分尚无规模化收入贡献。建议等 Q2 交付数据和 Robotaxi 单位经济学落地后再做加仓决策。

近期价格走势

图 1. TSLA 近 20 个交易日走势（3/26 - 4/23）。4/17 冲高 $409 后回落，财报后因 capex 指引下跌。

财务概览

指标	FY2024	FY2025	Q1 2026
营收	$97.7B	$97.0B	$22.39B
GAAP 净利润	$7.1B	~$3.0B	$477M
GAAP EPS	$2.04	~$0.86	$0.13
Non-GAAP EPS	--	--	$0.41

the product is hard and the supply chain is physical. Long arc: move civilization to multi-planetary, sustainable energy, beneficial AI. Core depth in rocket engineering, mass manufacturing, capital markets, and first-principles problem decomposition.

Experience

1995 - Present · six companies, one reusable rocket, one mass-market EV

1995 Internet era
Zip2 -> X.com -> PayPal. Sold two internet companies before age 32.

2002 Space + autos
SpaceX, Tesla, SolarCity. Built physical infrastructure others called impossible.

2023 AI era
xAI, Neuralink scaling, X platform ownership. New bet on general intelligence and BCI.

SpaceX · Space launch · reusable rockets — FOUNDER

ROLE: Founded 2002. CEO and Chief Engineer from day one. First private company to orbit (2008), dock ISS (2012), land a booster (2015), and fly crew (2020).

ACTIONS: Full vertical integration from propellant to avionics. Merlin and Raptor engines in-house. Reusable-booster thesis pursued through 12 failed landings. Launch cadence: 1/year (2008) to every 2-3 days (2024).

IMPACT: Falcon 9: 400+ launches, 95%+ reuse, 10x cost reduction. Starlink: 7,000+ satellites, largest constellation ever. Valued at $350B (2024).

Tesla · EVs · energy · autonomy — CEO

ROLE: Lead investor 2004, CEO from 2008 during near-bankruptcy. Built from a two-car project into the world's most valuable automaker.

ACTIONS: Master Plan framework: each model funds the next. Four Gigafactories on three continents. FSD shipped as continuous software, not fixed release. Vertically integrated batteries, motors, silicon, charging.

IMPACT: 7M+ vehicles delivered (1.8M in 2023), first EV to cross 20% gross margin, first automaker past $1T. Every major OEM announced EV transition within 5 years of Model 3.

xAI · Frontier AI · foundation models — FOUNDER

ROLE: Founded 2023 to understand the true nature of the universe. Shipped Grok within 6 months, one of the fastest foundation-model companies to production.

ACTIONS: Built Colossus (100K H100 GPUs) in 122 days from concept to training start. Integrated Grok directly into X for real-time data access and instant distribution to 500M+ users.

IMPACT: Colossus in 122 days, a pace the industry called implausible. Grok reached ChatGPT-level benchmarks within 18 months. xAI valued at $50B (2024).

Neuralink · Brain-computer interfaces · BCI implants — FOUNDER

ROLE: Founded 2016 to build high-bandwidth brain-computer interfaces. Co-leads engineering on the N1 implant, surgical

Context

Analysts were producing strong raw research but weak final communication. The product goal was to bridge that gap without forcing everyone into a slide-first workflow.

Approach

I treated templates as decision aids rather than decoration, with reusable evidence blocks, narrative scaffolds, and source visibility built into the layout.

Outcome

Weekly briefing output rose from 3 to 8 deliverables, and leadership teams began using the product for recurring board materials.

Selected Works

2025 Service Blueprint Library Internal

An internal report composer that turns research traces into executive-ready briefs.

2024 Service Blueprint Library Internal

An internal report composer that turns research traces into executive-ready briefs.

2023 Service Blueprint Library Internal
